ABOUT US

The Virgo Group of companies constantly looks out for innovation and challenges in the industry. Across all its group companies, it maintains a philosophy of reaching out to perfection, no matter what it takes, whether high-end resources or a superlative manpower. With a team size of over 3000+ employees, Virgo Group's employees spread all across the nation are working together in a rewarding environment to achieve the objectives the company was founded upon. Long before, government-issued regulations concerning the protection of the environment, Virgo Group had already invested in "Environment Friendly" initiatives. These included reforestation programs and elimination of the use of tropical woods and harmful, ozone-damaging chemicals. Weighing its actions on a philosophical pedestal, Virgo today has evolved into a dynamic group that has been generating optimum profit through total satisfaction of customers, suppliers, employees and society.

INDEX

90° BENDING PROCESS IN PVC LAMINATES

EDGE BAND TAPES NOT REQUIRED

STEP 01

Cut your sheet as per your desired size and shape.

STEP 02

Use a V-groove cutter (available easily in the market) to mark a groove on the sheet.

STEP 03

Next, use a regular pair of scissors to trim the edges out.

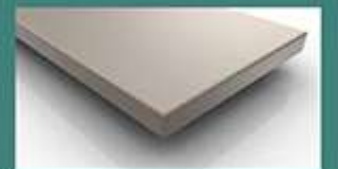

STEP 04

Place the sheet front up and use the groove marks to bend the sheet towards the outside.

STEP 05

Now your sheet is ready to be used.

**Diamond
cutter blade**

**Router
blade**

For cutting, routing and drilling, we only recommend using a diamond cutter blade. To avoid any burrs during cutting, ensure all the blades are sharp. A smooth file can be used to feather all the corner edges.

A 4"x8 mm x 6 Tee Radius C-groove blade should be used for bending Virgo PVC laminates. The recommended groove depth is 0.8 mm & width 5 mm or more. Routed sheet will easily bend up to 90°.

KITCHEN INTERIORS
